Attachments: [Practical Design Partners Task Order 8](#)

*City Engineer Bethany Watson stated that in reviewing the traffic patterns for the new Cherokee High School and in consultation with Georgia Department of Transportation (GDOT), staff recommends utilizing a Restricted Crossing U-Turn (RCUT) pattern for the new entrance of the high school at Dr. Martin Luther King Jr. Boulevard. An RCUT will direct outbound traffic from the school to the right and towards Reinhardt College Parkway, while allowing a left turn from that direction into the school. This will cut down on cross traffic conflicts. Staff is requesting action to complete the design and project prior to the start of the next school year. Councilor Roach made a motion to approve Task Order 8 to Practical Design Partners for an RCUT at the new Cherokee High School in an amount not to exceed \$34,000. Attachments: [Bucket Truck IGA](#)

***Mr. Ingram noted that last fall the City placed the old bucket truck up for surplus. A new bucket truck has been purchased and is in the City's fleet. The City intended to place the old truck on GovDeals, however the City of Ball Ground approached the City about the purchase of the truck. Mr. Ingram stated that staff consulted with the City Attorney if this could be accomplished outside of a traditional bid and it was determined that the City could dispose of the vehicle to Ball Ground through an Intergovernmental Agreement (IGA). Mr. Ingram stated that the City of Ball Ground has offered \$3,500 and is amenable to a condition that would allow Canton to borrow this equipment should our new equipment be down for service. Councilor Yawn made a motion to approve the IGA with the City of Ball Ground to purchase the 2000 Ford F-550 Bucket Truck. Councilor Rice seconded the motion, and it was approved unanimously.***

- D. Discussion of the Reservoir Manager Position at Hickory Log Creek Reservoir Located on Lake Canton - City Manager Billy Peppers

Attachments: [Reservoir Manager Position](#)

*Mr. Peppers informed that there are two documents that govern the Hickory Log Creek Project: 1.) A Joint Project Agreement (JPA) with Cobb County-Marietta Water Authority (CCMWA); and 2.) A Reservoir Management Plan (RMP) by the City of Canton. The JPA outlines the staffing of the reservoir operations, cost-sharing, and allocation of the resource. The RMP outlines the use of the reservoir and impacts from adjacent properties. The Reservoir Superintendent, which handles operations, is a CCMWA employee that is jointly funded by the City of Canton. The Reservoir Manager is responsible for reviewing permitted uses on the reservoir, applications for use, protection of the buffer areas, and making determinations about use compared to the JPA. The RMP states that the position will be a City employee. Mr. Peppers stated that he recommends the creation of a policy to allow the Reservoir Manager to be the Reservoir Superintendent at the discretion of the City Manager and to set up a review process so that the City still controls the final decisions on permits, applications, and approvals. Mr. Peppers noted that a draft policy will be presented at the next Council meeting.*
